Feature:

- Soft amber hue when night light mode activated
- Without recessed cans or a separate j-box
- CRI 90 for true color rendering
- No flicker
- Compatible with most triac dimmers to give user a smooth 100%-10% dimming to choose the desired brightness.

1. SELECTING MAIN LIGHT MODE OR NIGHT LIGHT MODE

The product has two modes: main light mode and night light mode. Main light mode provides full brightness and allows selection from five color temperatures: 2700K, 3000K, 3500K, 4000K and 5000K. Night light mode provides reduced light output at 2000K color temperature for very soft illumination at night.

2. CONVENIENT CONTROL USING LIGHT SWITCH

Switch the downlight off and back on again within (1-4) seconds to activate night light mode.

NOTE: The main downlight will not provide light output when the night light trim is illuminated.
